Work Experience

Go With DOT (Full Stack Developer)

Sep 2020- Present

My work here majorly revolves around writing Api's and microservices in python/flask but if the situation demands I also help with front end stuff using react and have also done projects on Laravel/ Lumen as well.

Niswey (Web Developer, Intern)

Jan 2020- June 2020

Woked on one of the marquee products like "GETBAAS", A Bot as a service tool built to provide leads through crawling web, based on filters applied.

STACK :- Html, Css, Js, Php, Node.Js, MySql
<http://getbaas.xyz>

Built a admin dashboard for their main product in the market called "WhatHub", It's a whatsapp and hubspot integration app.

PROJECTS

GETBAAS/Web App

Jan 2020- April 2020

Automation tool built for marketers and sales people in the organization to find the desired leads, which led to the increase in sales by over **30%** with less time taken then it used to.

Portfolio Website

Dec 2020 – Dec 2020

It was difficult to write all the project in a single page resume, thus I built this portfolio website.

Slack Clone/React Js

March 2021 – Present

A project in which I have tried to mimick the chat fuctionality and design of a popular app in professional world called Slack.It's still in process as I look forward to add more features to it, right now you can login, logout, add a channel and chat in that channel, all real time.

STACK:- React Js, Firebase, Styled Components, Redux
